

Outcome Essay 1

In a reflective/analytical essay, address each of the following learning outcomes as they pertain to what you have learned throughout your degree program.

1. In your essay, identify the course(s) related to your achievement of the outcome elements listed (some elements may be covered in more than one course).
2. List assignments, projects, group activities that helped you in your learning. If possible, upload a copy of the actual document you submitted for the class.

The first two elements above can and should be presented as bullet points rather than a narrative. A simple one or two sentence introduction to what they are before listing them would suffice.

3. Provide an **in-depth narrative** (using headings to distinguish which element you are addressing) of what you have learned and know about each of the following elements. Describe:
 - Your use of research databases to discover, interpret and integrate reliable research within the field of communication.
 - Your understanding of the core knowledge within the discipline of communication.
 - Your understanding of the principles of managing communication in an applied setting.
 - How you have organizing thoughts and competently express them in writing, through speech and in visual forms.
